Forsee Succeeds Allison Who Will Work With Fibers

New Director Long Active In Religious And Civic Circles

Dr. W. T. Forsee, Jr., will become chemist acting in charge of the Everglades Station at Belle Glade July 1, it was announced today by Director William M. Fifield of the University of Florida Agricultural Experiment Station.

He will succeed Dr. R. V. Allison in charge of the branch station. Director Fifield said Dr. Allison is being relieved of administrative duties to devote full time to research with fibers, which are of increasing importance not only to Florida but also to the United States.

Dr. Forsee, who has been approved by President J. Hillis Miller and the State Board of Control today, is a member of the Everglades Station staff continuously since April 1937. He is well known to the people of the state and the country for his significant contributions in the field of soil chemistry at the Everglades and the east coast of Florida.

A graduate of Georgetown College, he received master of science and doctor of philosophy degrees from the University of Florida and has studied at the University of Kentucky.

Dr. Forsee is a member of several honorary scientific societies, including Phi Kappa Phi. (Continued on Page 4)

Field Day Crowds Look, Listen, Eat At Ex. Station

More than 130 cattlemen and others from near and farway packed around the Everglades Experiment Station's field day for cattlemen Wednesday, M. A. Mounts, County Agent and Assistant Agents H. L. Spear and John Causey, cooperated with Experiment Station officials in program demonstrating experiments and progress in Everglades beef and dairy cattle raising.

More than 75 people were on hand early, and crowded into three giant trucks for a morning tour of Experiment Station pastures and crops. Under a blazing sun they viewed the trial pastures where experimental lots of cattle are being used to test the feeding experiments and despite the heat, enthusiasm remained high. Dr. Robert H. Hays, Associate Animal Husbandman, was in charge of the microphone on the sound truck which played the national anthem and led to various lots of purebred Devons, Brahms, and Angus, as well as crossbred cattle, pastured mainly on a Penna. grass. As the trucks passed along the fence, a colorful "cowboy," Herndon Harold Brough, rounded up the animals, singing out particular ones for view and sale.

V. E. Green, assistant associate plant physiologist, was on the truck with the cattle. (Continued on Page 4)

Miss Mary Winne, a product of the Glades, daughter of Mr. and Mrs. Ross Winne, is joint editor of the Herald Staff as assistant to the Editor.

If you see Miss Winne around here, stop her and give her the news—that's what she's looking for. If she calls on you or phones you, please give her consideration.

Her qualifications include ability to write, talk and make intelligible glades and we ask the cooperation of the public in her effort to get the news in THE HERALD.

PAR-TEE LINE

Country Club of the Everglades

The Lions Club will install new officers in ceremonies tonight at the Municipal Country Club. The new officers are: President, Herman Cline, outgoing president, urge every Lions to attend and help partner to help make this last event of the year's activities an outstanding success.

The Cottillion Club Dance will be held Saturday night (July 5) beginning at 10 o'clock. Members may bring guests.

Pro Zeeman announces that all year Golf membership is now available at the Community Golf Center—it's time to get your game in shape for the tournament this fall.

Who's The Boss? Bothers The City Fathers At Times

Work Ending To Tuesday City Commission Session

An atmosphere of peaceful accomplishment overhanging the deliberations of Tuesday night's City Commission meeting, narrowed only slightly towards the end of the session by warm exchanges between City Inspector Willis and Commissioner "Cocky" Carlson.

All Commissioners were in attendance at the meeting, which opened at 7:30 p.m. The agenda was a long one, including a report on the work of the City Engineer, a report on the work of the City Auditor, and a report on the work of the City Clerk.

Mary Winne Gives Rotarians History Of Italian People

Outlining the historical amalgamation of the Indo European people, Mrs. Winne, who is a member of the Rotarian Club, gave a most interesting and informative talk to the Rotarians at their meeting last night. She outlined the history of the Italian people, from the time of the pre-Christian era to the present day. She also outlined the history of the Italian people in Florida, from the time of the first Italian settlers to the present day.

Little Girl, FROG RIDES BIG FISH—HOOE HIDE

Nine-year-old Su Ellen Boone hooked a whole—or at least, the kids, A 15-pound grouper that Su Ellen landed at Key last Friday from a fishing trip with her father, Mr. Boone. The fish was the biggest catch of the day, and rated Su Ellen first deep-sea fishing trip with the Charlene's skipper when ever Su Ellen wants to take it. She has no trouble at all in her free time includes her parents, Mr. and Mrs. C. A. Boone, and her two brothers, ages 5, fishing with her when she landed her catch.

Miss Mary Winne, a product of the Glades, daughter of Mr. and Mrs. Ross Winne, is joint editor of the Herald Staff as assistant to the Editor.

If you see Miss Winne around here, stop her and give her the news—that's what she's looking for. If she calls on you or phones you, please give her consideration.

NEWS OF GLADES BOYS AND GIRLS IN THE SERVICE

est L. Messer, 425 S. E. Third Street, who has been serving with the Coast Guard since last May, is a patient in the Veterans Hospital in Coral Gables.

Messer arrived home May 17, on 21 day leave from the Coast Guard. He is a member of the Glades Boys and Girls Club, and is a member of the Coast Guard. He is a member of the Coast Guard, and is a member of the Coast Guard.

KILGORE COMPANY TO HAVE NEW WAREHOUSE

Construction of a new warehouse for the Kilgore Seed Company was begun on Tuesday.

The old warehouse, near the FEC Station, is being dismantled to make way for a new and larger concrete block construction on the site. The dimensions of the new warehouse when completed will be 150 by 45 feet. Bert Roemer, contractor, has the job, and estimates that with fair weather and without hurricanes, the building should be finished within 90 days.

Teacher Plagued By Househunting

Know of a house for rent, or a house to buy? This may be a question for one of our newly appointed teachers.

Miss Mary Winne, who is a member of the Rotarian Club, gave a most interesting and informative talk to the Rotarians at their meeting last night. She outlined the history of the Italian people, from the time of the pre-Christian era to the present day. She also outlined the history of the Italian people in Florida, from the time of the first Italian settlers to the present day.

City Asks Help To Keep Down Flies

How lazy are Americans? It is true that we would rather sit on the porch and drink, or some other money contribution to the March of Dimes, than to get up and do the work of the fly swatter, or take the time to clean up the house. It is a fact that the city of Belle Glade is plagued by flies, and the city is asking for help to keep them down.

REV. L. WANDERWATER IS PASTOR AT COCOA

Of interest locally is the announcement that the Rev. Leonard Wanderwater is now pastor of the Methodist Church in Cocoa, Florida.

THE ROSS WINNE'S 42 YEARS MARRIED

On Sunday morning, June 22, the telephone rang in the home of Mr. and Mrs. Ross Winne. Chosen, and the lady of the house answered it.

"Mrs. Winne said the friendly voice of Dick Leffels, 'somebody must be taking it to your 42nd wedding anniversary.'"

"Why, Dick," she said jokingly, "I didn't even know you knew I was married."

The point is that ever since the Winnes lost their marriage certificate in the hurricane of 1928, Mr. Winne has tried his wife that they weren't properly married. But with or without good, they celebrated their anniversary on Sunday, with a little party given, with a little party given, with a little party given.

Prison Farm Establishes 2,000 Head Breeding Herd At Old Riddle-McKay Field

The approximately 30,000 wards of the State of Florida are in for a treat.

Eventually they will be fed only western beef—was of Twenty-Mile Bend. Superintendent Cliff Green announced this week a long anticipated plan of Nathan Mayo to really make the Glades Prison Farm a "meat center" for the people when the State of Florida must feed—the prison system, the school system, and the State controlled schools.

Legion Conference Names Lady Chief

For the first time in the history of the Florida Branch of the American Legion, a woman has been elected to the office of district commander. The annual conference of the 9th District, held at Oklawaha Sunday, Mrs. Margaret C. Moore, adjutant of Gardena Post 170 (the all-women Post) was elected without opposition. She is one of the few women in the United States to hold such an office.

Recreation Center Plans Field Day

Games of all kinds—old fashioned and new fashioned—will be featured in the Field Day to be held at the Municipal Park on Friday, the Fourth of July. The Belle Glade Summer Recreation Program, in conjunction with other recreation centers in the Glades area, is planning a number of events to give kids and spectators a good time.

A DECENT WAGE

When you make a purchase in a retail store, you know that some of your money goes to buy the goods, the store sells, some of it goes for wages, taxes, and other overhead costs, and some of it represents the store's profit. But the chances are you don't know how small the latter item is.

A survey was recently published dealing with the 1951 financial experience of the nation's large department stores. These stores earned a net profit, after taxes, of 2.4 per cent of sales. This was a 14 per cent below last year, and represented the lowest return since 1939.

In other words, the stores were able to keep after all the bills were paid, only a little more than two cents out of each dollar that they were through their tills. If they had made no profit at all, the consumer would have hardly been able to notice the difference in the prices of the goods he bought.

Modest profits are one of the results of competition—consumers are intensely price conscious these days, and every up-and-coming merchant does the best he can to offer more inducements than the merchant down the street or in the next town. But profits can be forced down to dangerously low levels by unsound and destructive government controls and regulations. OPS policies have made it extremely difficult and in some instances impossible for retailers to pass on rising costs which they can do nothing to prevent. This is an artificial form of "profit control" which could do immeasurable harm to the whole economy in the long run. A business, like a worker, is worthy of a living wage.

From where I sit... by Joe Marsh

Telephone woke me out of a sound sleep last Friday about eleven-thirty. "This is Whitey Fisher on the River Road," says a voice. "I just want to tell you how much I like this week's 'Climax'."

"Thanks, Whitey," I told him. "But why in blazes call me 'Whitey'?"

"Because," he says, "your paper boy just delivered it a short while ago. Been waiting for it all evening."

Next day, Buzzy Wilson tells me he delivered Whitey's paper late because he stayed for the school dance and thought it was OK to drop it on his way home.

From where I sit, I can't blame Whitey for his joke. He was just as they in their clothes the same respect we expect from them. Since I'm always talking about respecting the other fellow's rights—including his right to enjoy a glass of beer if he chooses, it was only fair that Whitey should "wake me up" to let me get his copy of the *Climax* on time. Thanks again, Whitey!

Joe Marsh

The Gardener's Corner

THE USE OF VINES IN LANDSCAPING

By Mrs. Clarence T. Aspy
Bloming vines are almost a necessity in the garden, especially in the small garden where space is limited. No one group of plants can surpass the annual flowering vines in producing great numbers of showy fragrant blossoms, interesting foliage and fruit on a small surface of ground.

Vines are very useful in covering up unsightly places, and giving privacy and shade when trees and shrubs are small or absent.

These plants should be selected for the purpose for which they are best adapted. Certain groups work well on masonry; others must have wires or cord for the tendrils to curl around. The texture of the vine should also be considered when planning the trellis to use, as some vines are much heavier than others and require much stronger support. When used on fences or wooden trellises, a strong support will start them on their upward climb. Later the weight of the mature vine will cause it to drape gracefully.

They are divided into two general classes—annual and perennial; hardy or, as often referred to, woody. The annual vines, as well as some of the smaller hardy types, grow very well in well-drained soil which has received ordinary digging.

The larger, hardy varieties, however, are often found to remain in a single spot for a long time. The hole for a vigorous vine should be at least two feet square and two feet deep. The ground in the bottom should be broken up made to drain if the soil is hard. The excavation should then be filled with good soil, well supplied with fertilizer. Each plant should have a space three to six feet square in which it will not have to compete for food and moisture with other strong growing plants.

No vine should be placed where water drips on it every time it rains. This is bad for the foliage besides washing the soil away from its roots. Also, care should be taken that roots are not high enough so they will not stand long in water after our heavy rains here.

When planting, spread the roots to the fullest extent, cutting off all broken or injured ones and take care to see that supports are made of substantial, long lasting material. Due to our damp atmosphere here, wooden trellises do not last as long as they in drier climates. Water pipes for posts and wire for the trellis will serve the purpose much better.

Vines grown against a sunny wall should receive special watering. They get heat not only from the sun, but also that reflected from the wall. At night, the heat is reflected from the wall long after sundown.

Use vines for screening, for correcting or softening architectural lines, for flowering beauty; but do not cover and blot out good architectural detail.

Here are listed some of the best known vines for this area: Alamanda (yellow blossoms, evergreen glossy leaves—no spraying for pests necessary); Bougainvillea (very rank grower, many colors of blossoms; needs heavy, strong support); Coral vine (coral pink sprays of blossoms; plants coming up from roots prove to be pests at times); Angel's Trumpet (wonderfully fragrant, large creamy yellow trumpet, glossy leaves. Needs strong trellis); Nightshade (Costa Rica) (blue sprays of blossoms, attractive leaves); the night blooming jasmine (heavily fragrant, Stephanotis (triple flower); Clitoria (Bohemian); (dies down after blooming, to come up against next year—perhaps best from the original site); Moon vine (the cultured type makes a wonderful vine for night blooming in the garden, and the fragrance is very pleasing); Perennial and annual morning glory (Mexican flame vine); regular flame vine (heavy blossoms); Wisteria, and many others.

For further cultural directions, information may be secured from our Garden Center in the Library, or from Mrs. T. E. Hollingsworth, Garden Center Chairman.

GIRL SCOUTING - BELLE GLADE
Dear Parents:
Did you grow up in the wide open spaces, as many of us did, remembering the smell of new-mown hay, flying through the air on Dobbin's back, and hear-

Belle Glade Herald

ing the crow of the cock at dawn? Or perhaps in a city where you joined well organized groups and took part in the activities?

These are pleasant memories of childhood, an era cherished in our past. But what of your child's memories of the formative years? What has our community to offer your child as he grows into manhood or womanhood?

It has much to offer in many ways, but one of the highest and most beneficial is that of Scouting. The Scout program covers indoor as well as outdoor activities, to mention a few—arts and crafts, sports, camping, homemaking and community service. In Scouting children learn to work, live and play together; Scouting goes hand in hand with home and school.

Belle Glade is a perfect community for the Scout program. Our children need this program to help prepare them for future living.

Girl Scouting in Belle Glade has reached a low ebb. The situation is serious and if not remedied our girls will be deprived of this wonderful experience. We should have had a taste of Scouting—like Scouting and want the Scout program. We are going to let our girls down.

If you are interested in any way in the Scouting of our community and the Scout program, be sure to watch for and read this column for further news and reviews on Girl Scouting in Belle Glade.

A Scout Leader

Girl Scout Troop 1 will have the concession for cold drinks and sandwiches at Field Day, 9 to 12 a. m. July 4, at Municipal Park. A booth will be erected by the scout girls in the center of the park for the convenience of those attending.

LADIES AID SOCIETY

MEETS AT RIEDEL HOME

Mrs. Harold Riedel opened her home recently for the second monthly meeting of the Ladies Aid Society of St. Peter's Lutheran Church. Mrs. Frank Kruse the temporary president presided over the business meeting.

Mrs. Kruse announced the regular slate of officers would be selected at the November meeting.

SOUTH BAY BEAN CITY LAKE HARBOR

Former Chief of Police C. G. Payne suffered a heart attack on June 16 and after a week's treatment at the Pahokee Hos-

pital was transferred to Pratt General Veterans Hospital in Coral Gables Monday for a six weeks' rest and treatment.

Mrs. D. N. Partin has as her house guest her sister, Evelyn Chambers of Rockmart, Ga.

Mr. and Mrs. Melvin Herring and sons, Mickey and Richard

LOOK... NO HANDS!!

CUTS BY ITSELF—JUST STAKE OUT!

SNAPPIN' TURTLE THE SELF-PROPELLED ROTARY LAWN MOWER

Here is the lawn mower that cuts by itself, while you rest... just stake it out on your lawn. It has no wheels, but glides on traction rollers and skidpans. It's self-propelled. Fingertip start, stop and reverse. No pushing—just guide it, or stake it out. Climbs steep banks, cuts all kinds of grass, pulverizes clippings and mulches your lawn. No raking. Be sure to see this new idea in lawnmowers before you buy any more.

are vacationing on Fort Myers Beach for six weeks.

Roger Walker of Macon, Ga. is visiting his sisters, Mrs. H. L. Shiver and Mrs. J. C. Warren, in their families and other relatives in South Bay.

Patricia Garner has returned from Jacksonville where she spent three weeks with her mother, Mrs. Geraldine Garner. Daisy Jo who accompanied her to Jacksonville is remaining indefinitely.

Byron Walker spent from Friday to Tuesday at Fort Myers Beach with his cousins, Mickey and Richard Herring.

Mrs. E. L. Stevens has received word that her son, Tommy Dean who was injured in an automobile accident recently is recovering nicely at his home in Lake Worth.

Raymond Wilder of Lake Harbor is critically ill at a West Palm Beach hospital. His daughter, Miss Jeanette Wilder of Haines City and his brother, Floyd Wilder and wife, vacationing on Fort Myers Beach, have been summoned to his bedside.

Mr. and Mrs. Frank B. Willis are enjoying a week's vacation with their family in the central Florida lakes region.

Mr. and Mrs. W. F. Martin and family, who enjoyed a week's vacation in Miami, were the weekend guests of his father, O. H. Martin en route to their home in Cleveland.

Mrs. J. C. Bowen and children have returned from a week's visit with her mother, Mrs. Marie Mullin in Miami Beach.

Mr. and Mrs. Louie Challancin and family have returned from a fortnight's vacation visit with relatives and friends in Panama City and Alabama.

Mrs. Clayton Waters and Mrs. Mary McCarron are visiting relatives in Chattanooga this week.

Mr. and Mrs. W. C. Allen and granddaughter, Susan Allen attended the 9th District American Legion Constitutional Conference in Oklawaha Saturday.

Mr. and Mrs. H. B. Walker, their family and Roger Walker of Macon, Ga., enjoyed an outing at Fishing Creek on Friday.

Mr. and Mrs. Wm. Lowery, son Stevie, and brother, Carl Lowery have gone to Savannah, Ga. for a two week's vacation.

Mr. and Mrs. J. H. Hodges and grandson have returned from a fortnight's visit in Dothan, Ga.

Mrs. G. J. Barstow has returned from a three week's vacation during which she attended her class reunion at the University of Chicago, visited her mother, Mrs. H. M. West in Caxton, Iowa, and her son, Carl Barstow and family in St. Louis, Mo.

Miss Pauline Walker has returned home from Miami where she has been visiting her sisters, Miss Maxine and Miss Marlene Walker for the past two weeks.

Mr. and Mrs. W. G. Bowen and family are expected home from Statesboro, Ga. this week. They have been visiting his parents, Mr. and Mrs. W. H. Bowen.

Mrs. Julian Clark and children of Tampa are visiting her father, John Challancin and sisters, Miss Sparacore and Miss Victoria Challancin.

O. H. Martin motored his daughter, Miss Verma Martin to her home in Miami Sunday after a fortnight's vacation visit and took dinner with Mr. and Mrs. J. H. Hawkins.

Tom Jacobs, step-father of Mrs. O'Neal Walker, who was badly burned while working on a electric line in Fort Myers recently, is reported recovering nicely from his injuries.

Mr. and Mrs. Calvin J. Peacock and family have moved to Tomsen. He will be head football coach and athletic director at the Belle Glade High School his coming year.

Mrs. James Anapui is staying with her parents, Mr. and Mrs. R. R. Roadman, Jr., during her husband's absence on summer maneuvers and training with the Navy.

I. P. Roberts is slowly recovering from a fractured foot sustained in a fall on June 4.

Mr. and Mrs. Andrew Nick have returned from a three week's absence during which they visited in Gastonia, N. C. and took treatments in the hospital at St. Augustine. They were accompanied home by Miss

Charlotte Smith, who will remain indefinitely.

Mrs. Tom Jacobs and daughters, Mrs. Evelyn Nyehyk and Mrs. Esther Haven of Fort Myers are house guests of Mr. and Mrs. O'Neal Walker this week.

Later Day Saints
Hold Regional Conference

A Regional Conference of the Church of Jesus Christ of Latter Day Saints at the Fort Myers Chapel Sunday was attended by 18 members of the local church of South Bay.

Elder Lacy D. Croft of Fort Lauderdale presided and Elder Robert G. Sorenson, recently appointed president of the South Florida District to take the place of the late James A. Martell was also present and took an active part in the conference.

Elder Arden J. Palmer, having completed his two years mission, has been relieved by Grant Street of Syracuse, Utah. Those attending from the Glades were Mr. and Mrs. Julius Herring, Mr. and Mrs. John Windish and family, Harvey Wiggen, Mrs. Hattie White, Mrs. Elizabeth Roberts and daughter, Elsie, Mr. and Mrs. Melvin Herring and family, Mrs. Gloria Moore, Mrs. H. B. Walker, Byron and Nell Walker, all of South Bay and Belle Glade and D. L. Campbell of Fort Lauderdale.

Legion Auxiliary
Entertains Their Friends

The South Bay American Legion Auxiliary entertained the legionnaires and friends at a fried chicken supper at the Legion Hall on Monday evening. Mrs. H. H. Walker was in charge with all members of the auxiliary as a committee to prepare and serve the supper. Approximately 35 persons enjoyed the dinner and social good time.

DEFENSE DIGEST

(Continued from Page One) reside in New Orleans than any other large city. An annual budget of \$3,812 would provide "modest but adequate" level of living, there, compared to \$4,454 required in Washington, D. C. Here's how the Southern cities rank according to the estimated total cost of the city budget:

1. Washington, D. C.
2. Richmond, Va.
3. Atlanta, Ga.
4. Houston, Tex.
5. Birmingham, Ala.
6. Baltimore, Md.
7. Jacksonville, Fla.
8. Memphis, Tenn.
9. Norfolk, Va.
10. Savannah, Ga.
11. Mobile, Ala.
12. New Orleans, La.

Cities having the highest food costs in the South, according to BLS, are Savannah, Mobile, Atlanta and Birmingham, in that

order. Emphasis is made that these statistics are for large cities. Miami, Florida, is not a "typical Southern city" and therefore, is not included in the survey.

FEDERAL INCOME TAX REFUNDS have not yet been fully processed in most sections of the country, so if you haven't yet received the check you expect, do not be concerned. Yet, however, if you have moved since you filed your 1951 return, you filed your 1951 return, chances are good that your check has gone—or will go—to your old address and postal regulations forbid its being forwarded. You can get it by writing a letter, giving your correct new address, to the Collector of Internal Revenue for the area where your new home is located.

NO OFFICIAL estimate of the 1952 cotton crop can be made by the Department of Agriculture until August. However, estimates from other sources indicate that it will reach a goal of 18 million bales. The 1951 production was 15,130,000 bales, the USDA reports, with the output in 1952 expected to be 16,000,000; Georgia, 931,000; Alabama, 909,000 and South Carolina, 871,000.

NEWSWEEK magazine will carry an article on the U. S. Forest Service activities in its June 2 issue. One of its editors, George Boehm, has just completed an inspection trip of Southern forests, accompanied by Clint Davis, formerly of Atlanta, now in the Washington office of the Forest Service.

THE CIVIL SERVICE COMMISSION has taken over loyalty investigations of new federal employees from the FBI. There are several openings (Grades GS-7 and GS-9) for experienced men in this type of work. Inquiries should be directed to the Commission's regional headquarters at Atlanta.

SATURATION POINT has been reached in the labor markets at Savannah, Georgia, and Charleston, South Carolina, the Bureau of Employment Security, Department of Labor, reports. This means the demand-and-supply of industrial labor in the two cities is "in balance."

PUBLIC HEALTH Laboratory Directors from 49 or more states and from as far away as Hawaii will meet in Atlanta June 2-6 as guests of the Communicable Disease Center, Public Health Service, Federal Security Agency. Dr. E. J. Snikes, Director of Laboratories for the Georgia State Department of Public Health, is chairman of the committee on arrangements. Other southeastern states will be represented by their State Health Department's directors of laboratories, as follows: Alabama, Dr. Thomas S. Hosty, Montgomery; Florida, Dr. Albert V. Hardy, Jacksonville; Mississippi, Dr. C. Bick, Jackson; South Carolina, Dr. Harry F. Wilson, Columbia; and BLS, are Savannah, Mobile, Atlanta and Birmingham, in that

PROTECTION FROM LIGHTNING ON FARMS

Lightning is the greatest single cause of farm fires in Florida, and it damages property and kills or injures many men, women and children each year. What to do to protect farm buildings from the bolts out of the sky is told in detail by A. M. Pettis, farm electrification specialist, Gainesville, in July 1952, Florida Farmer Magazine. The National Safety Council says Florida has the largest number of thunderstorms each year of any state in the country from 70 to 90—and mostly on the Central West Coast. On a essential is proper grounding of the equipment in farm home, barn or shed. How to do this is described in detail in the Grower article.

TIME WAS when I just brightened a few bulbs and sent you a "LIGHT BILL"...

...BUT
LOOK WHAT I DO TODAY!

CHEAP, TOO! Figure it this way: Divide my bill by 30 days... and by all the jobs I do. You'll see why folks in Florida use more electricity than people in most other places... it's cheap... it's clean... it's modern... it's the sure way to enjoy...

Have you tried BUICK'S POWER STEERING?

smoothness that make this ROADMASTER so distinguished among fine cars.

Where then, you ask, does Power Steering come in?

When you want to get into—or out of—a tight spot at the curb. Power Steering takes over the extra effort of turning the wheels, and you can forget the two-ton-plus of automobile you're handling.

When you want to turn around in a narrow space. Power Steering lets you get the last inch of benefit from Buick's short turning radius, because it makes the maneuver so easy.

When one front wheel hits a bump, a

chuckhole, loose sand or dirt at the edge of a road—Power Steering takes up the jerk—makes control of the wheel easier and therefore safer.

Many folks who have tried it tell us that Power Steering has added almost as much to the pleasure of owning a Buick as Dynaflow Drive.

When would you like to try it?

Equipment, accessories, trim and models are subject to change without notice. *Optional at extra cost on Roadmaster only.

Too Late To Classify

By Russell Kay

Florida soil, which already has made a major contribution to humanity because it nurtured the world's first cultivated grapefruit grove, will be tested this month to see if it may not have other qualities important to human health.

Soil samples from all over the world flow into the research laboratories of Lederle at Pearl River, N. Y., where they are carefully tested for new antibiotics. Through such testing of soil samples from all over the world, scientists at Pearl River have discovered new molds from which various drugs have been developed.

Only a few years ago, a sample of earth from Missouri was processed by Lederle scientists, just as they have processed thousands and thousands of other soil samples collected throughout the world, in their tireless search for disease fighting antibiotics.

This Missouri soil appeared no different from samples of other samples, but when patient processing it was found to contain an interesting golden mold. Tests and experiments with this mold produced amazing results. It was found that it effectively prevented the growth of staphylococci and deadly streptococci. If you have ever suffered from "strep" throat, you will understand what this means. As a result it brought relief to millions of sufferers both human and animal in the form of a drug known as streptomycin.

A sample of earth taken from one of the most historic spots in Florida, Phillips Park, in Pinellas County where Count Odel Phillips planted the first grapefruit grove on the shores of Old Tampa Bay about the year 1840, was recently shipped to the Lederle laboratories by Annabel Rodger of Tampa, student of Southern College, who became interested in the search for new antibiotics and is collecting soil samples during her summer vacation.

This and other samples of Florida soil may or may not lead to the discovery of new remedies for human suffering but it is only through scientific research and patient, tireless work that such remedies are discovered and Annabel is hopeful that her work in the field gathering samples may lead to the discovery of some worthwhile knowledge that will benefit the human race.

It is fitting that her first sample should be taken from the Phillips promontory near Safety Harbor, for history records that this was once the location of the Indian Village of Ucia and it was here that Count Phillips began formal grapefruit cultivation 110 years ago. This historic spot is also believed to have been the location of headquarters for Hernando De Soto when he began his expedition on the west coast of Florida in 1513.

It would be thrilling indeed if the ancient soil of Florida, grove producer of new benefits for mankind, but even if it should fail to provide science with a mold or substance for a helpful new drug, it still has to its credit an enviable record for over the years the soil of this state has produced limitless quantities of healthful fruits and vegetables that have contributed to the health, happiness and pleasure of millions throughout the world.

Through her healthful agricultural products, Florida has served the world with sunshine packed produce that has benefited the young and old of many lands. Here, too, scientists in laboratories working with test tubes, have made it possible to preserve Florida products in many ways. Minute Malt, with its splendid citrus concentrate as well as other producers of canned and processed citrus products, have widened our markets and put these health giving fruits and juices into millions of homes that otherwise would not have known them.

Deep in the heart of the Everglades, in recent years, research laboratories are working diligently to give us additional benefits from the products of Florida's bountiful soils. In the laboratories of the United States Sugar Corporation, eager to give us better types of sugar cane and developing new uses for cane products. Not long ago a process was discovered for the manufacture of new products from bagasse, the residue left after the juice is extracted.

Other scientists are experimenting with kernal and rind that give promise of eventually providing Florida with a textile industry. It is indeed gratifying to think that in even a few billions on instruments of death and destruction we still are continuing the search for products that will bring health, happiness and

comfort to suffering humanity. Florida has contributed much to the nation's welfare in the past and will contribute more in the future.

DRIVE SAFELY ON-TH BE ALIVE ON THE STR

Twenty-four persons will lose their lives in the three day holiday in Florida. Of this number: 14 will be killed in traffic mishaps.

6 will drown.
4 will die of over exertion and too much exuberance.
This prediction is based on records of previous years, stated Asher Frank, Director of the Florida Safety Council.

The Lord did not intend that this be a period of bloodshed and the unnecessary waste of life, thru reckless, careless and drunken drivers and careless and drunken pedestrians.

We are calling on the Ministers, Civic groups, veterans organizations, and enforcement officers to urge their people to use common sense in their holiday celebration and at all times.

Grown ups and children should not go swimming "til one hour or more after eating and the "oldsters" should not get reckless and play too much baseball with the children.

Drivers are cautioned to leave their homes after sun up and before night, avoid night driving concluded Asher Frank.

Silver Spurs Rodeo Opens July 4th At Kissimmee

Day money of \$100 per performance brings the total amount of purses, exclusive of entry fees, to \$125 for the eighth annual Silver Spurs rodeo, which opens here Friday afternoon, July 4, it is announced by Tommy Bronson, radio chairman.

The three-day show will feature matinee performances on Friday and Sunday, and a night show on Saturday, July 5. The annual rodeo parade will be staged in Kissimmee Saturday afternoon.

Covered grandstand seats will be available for all performances which will be held in the Silver Spurs arena midway between Kissimmee and St. Cloud on Highway 441.

Fifteen acts will be included in the official program. Bronson said, with cowboys, contestants events for wild cow milking, bronc riding, calf roping, bulldozing or steer wrestling and bull riding. In all of these events the \$100 day money will apply.

In addition, a boys steer wrestling and a boys relay race will draw entrants from high school age brackets, lady riders will participate in the popular "covered" race, and relay teams from various parts of the state will compete in the Florida championship relay contest.

Melbourne's Horse Show Club, the Daytona Beach Silver Spurs Riding Club, and possibly the riding clubs from Orange County and Florida will compete with the Silver Spurs for the relay championship.

FARMERS SHOULD KEEP GRASS IN VEGETATIVE CONDITION IN SUMMER

Florida farmers who would obtain maximum beef production from their pastures during the summer rainy season must keep a sharp eye on their grass and cattle and manage them carefully.

Grass grows rapidly toward maturity during the summer, and it loses nutritive value as it matures. Dr. George K. Davis of the University of Florida Agricultural Experiment Station brought out this fact not long ago and suggested that farmers make every effort to keep their pastures vegetative and productive.

He told how some cattle that apparently were in abundant feed could do no more than maintain their weight when they should have been making steady gains, and he explained that this was the result of mature grass. In spring, he pointed out, grasses have a protein content of about 10 per cent and a fiber content of about 20 per cent, but their protein content drops to 4 or 5 per cent and their fiber content rises to about 30 per cent by the time they mature in late June. Thus, the mature grasses not only contain less protein, but their digestibility is reduced by their increased fiber, making it necessary for cattle to eat more of them to get enough nutrients to make gains or just maintain the weight they have gained earlier.

Fertilization will help to keep grass in a growing, vegetative condition. Nitrogen is especially important for vigorous vegetative growth. Fertilization in spring or early summer is not the only measure necessary for keeping grass productive, however. Dr. Davis explained that the grass must be grazed down for products that will bring health, happiness and

other, they can be concentrated to graze down the grass and then moved to another pasture, and thus the grass will be prevented from maturing and will be kept in good vegetative condition. If pastures mature in spite of grazing — when grass is not heavy enough — it is necessary to move to keep them vegetative. Some cattlemen harvested hay and grass seed from mowed pastures and also have noted that such pastures maintain more livestock than unmowed ones. When grass is more mature and cured properly, excess grass makes good hay. Wise cattlemen endeavor to keep their pastures vegetative, nutritious, and productive by fertilization by keeping them grazed or mowed down.

FLORIDA UNIVERSITY ENDS SUCCESSFUL SEASON

Commencement exercises for the end of the 1951-52 school year at the University of Florida over the past week end.

The Baccalaureate sermon was delivered by Dr. Horrell N. Hart, Duke University Professor of Sociology, and the Commencement address was delivered by the University of Florida President, Dr. J. Hill Miller.

Commencement Dr. Miller announced that the University had during the past year received a total of \$1,160,965 in contracts for research from government and private sources, including \$77,000 for cancer research and \$98,000 for medical school studies. Gifts and grants totaled \$84,035.

He said that construction on the campus, completed or near completion during the year totaled \$3,044,199. During this time ground was broken for a new \$2,000,000 student residence hall.

Dr. Miller also cited ten members of the faculty for 25 years or more service to the University. Other Commencement activities saw the James Miller Leake Memorial U. S. History Award made to Mrs. Norma Ruth Greenwood, Miami Beach. The award was presented by Mrs. Albert Vidal, Gainesville, state regent for the Florida Chapter of the Daughters of the American Revolution.

Norton Gallery Prepares For Special Exhibitions

Dr. Reginald Poland, director of the Norton Gallery and School of Art, has returned from New York City where he began preparations for a number of special exhibitions for the coming season at the Gallery. Though the names and details of these exhibitions, which are being lent by other museums, art dealers, and private collectors, will be announced until sometime in October, Dr. Poland stated that arrangements have been made for several important shows which it was felt would be of

interest to Palm Beach Art League members and the general public. Plans have been made for a varied film program. These activities together with the series of lectures, previews, and concerts will be announced in the fall.

Well into its summer exhibition schedule now, the Gallery is showing the work of Henry Casser, which consists of 25 water colors entitled "Baptism," in gallery 9 through June 29th, and on July 1st will open a showing of lithographs. The work of Stanon de Zubaira and the late Alfredo Ramos Martinez is still on view in the dean's office at the Gallery. All special exhibitions and the permanent collections are open to the public during regular gallery hours.
